Skills

- Architectural Design & Technical Drawing
- Construction Site Supervision
- Project Coordination & Management
- Site Inspection & Quality Control
- AutoCAD & Architectural Design Software
- Technical Documentation & Progress Reporting
- 3D Modeling & Visualization
- Project Coordination

Creative and detail oriented Architect with over 5 years of professional experience in architectural design, technical documentation, construction supervision, and project coordination. Experienced in translating client briefs and project requirements into functional, aesthetically driven, and practical design solutions while ensuring compliance with building standards, specifications, and project objectives.

Demonstrated expertise in developing architectural drawings, conducting site inspections, supervising construction activities from setting out through finishing, monitoring project progress, and identifying and resolving construction defects. Proven ability to coordinate effectively with clients, engineers, contractors, craftsmen, and other project stakeholders to maintain quality standards, timelines, and design integrity. Adept at managing multiple project requirements, interpreting technical drawings, preparing progress reports, and ensuring the successful execution of projects from design development through completion.

Work History

2026-07 - present

Supervising Architect

Philko Limited, Abuja

- Supervised architectural finishing works across assigned floors and rooms, ensuring compliance with approved drawings, specifications, quality standards, and project requirements.
- Conducted daily site inspections covering wall screeding, painting, tiling, sanitary wares, and accessories, identifying defects and ensuring timely rectification.
- Coordinated with MEP and interior design teams to resolve technical and site-related issues, maintain workflow, and minimize delays.
- Prepared daily progress reports, snag lists, and inspection records while monitoring the completion and rectification of outstanding works.
- Supervised construction materials, workmanship, and application methods to ensure proper utilization and adherence to project specifications.
- Liaised with contractors, subcontractors, and craftsmen to maintain work schedules, enforce quality and safety standards, and support timely project delivery.

2025 - 2026

Architectural Designer

Edificio Integrated Services (EIS), Abuja

- Developed detailed architectural drawings and technical documentation using industry standard architectural design software.
- Prepared floor plans, elevations, sections, details, and presentation drawings in line with project requirements and design standards.
- Translated client briefs and design concepts into functional, practical, and aesthetically appropriate architectural solutions.
- Supervised construction activities on site to ensure execution was in accordance with approved drawings, specifications, and quality standards.
- Conducted regular site inspections to monitor progress, identify defects, and coordinate the resolution of construction issues.
- Collaborated with contractors, engineers, artisans, and other project stakeholders to ensure efficient project execution and timely completion.

2024 - 2025

Architect

Engineer construction command (ECC) project coordinating office, Osun State

- Supervised the preparation and review of architectural drawings, technical documents, and project documentation for construction projects.
- Supported site supervision and inspection activities to ensure construction works complied with approved designs, specifications, and quality standards.

- Conducted site measurements, assessments, and inspections to monitor project progress and identify areas requiring corrective action.
- Coordinated with engineers, contractors, artisans, and other project stakeholders to address design and construction related issues.
- Monitored construction activities and prepared progress reports, site observations, and other project documentation for management review.
- Supported project coordination and quality control activities to ensure works were delivered in accordance with project requirements, timelines, and applicable construction standards.

2019 - 2020

Architectural Intern

Lagos State Development and Property Corporation (LSDPC), Lagos

- Assisted in developing architectural drawings, floor plans, elevations, sections, and technical details using ArchiCAD and AutoCAD.
- Supported the preparation and modification of architectural designs based on project requirements and site conditions.
- Assisted with site supervision and monitoring of building construction activities to ensure compliance with approved drawings.
- Conducted routine site inspections to observe construction progress, workmanship, and adherence to project specifications.
- Liaised with architects, engineers, contractors, and site workers to support effective project coordination.
- Assisted in documenting site activities, identifying construction issues, and reporting observations to supervising architects.
